

Mix Studio, Darryl Robinson (DJ Sir Jam): Top Story

DJ X Glenn Johnson *The Voice of Philadelphia* has arrived to his new home of Winterville, North Carolina. He's sure to be *Awesome Radio 106.9's* instant rising star. I personally feel the city of Philadelphia's loss with his upward Southern transition returning to his humble roots. The talent is all behind the "X," fueled even more with his love for God, and His mercy, grace and favor in all of DJ X's future steps.

A vocal sensation behind the microphone was caught in our nets as a rising star. His *Empire* is behind a sound board and computer. His three phases are record, produce and perform, His attention to detail, client needs and promptness can't be replaced.

Since he discovered and recorded new talent in Philly, his production eye will find many Southern Grammy Award-winners. *Brilliant* describes his DJ/KJ Studio achievements, he without doubt utilizes top quality equipment for every event. He has compiled the largest Karaoke library and MP3 catalog to make your event—over-the-top, always finding the latest technology in the market, makes him an engineer's dream.

I met Glenn in our electronic Musician Mix Technology sessions. Vocal processing and USB audio interface discussions are never-ending between us. Sound reinforcement technologies make him ready for your event from production to playback.

The newest cool phenomenon is mixing 4x Camera with IOS computer and multi-track video. Glenn has developed the newest ways to showcase both bands and multi-instrumentalists.

*Best of Show Sound and Video Contractor* awards go to Glenn Johnson, the smart choice. He's the Xtra for your event—and a sound investment both now and in the future.

Yours in Music
